Release Highlights Fourth Quarter 2023

Topic	Description
Financial subsector corporate equity issues at market value	New detail on corporate equity issues outstanding at market value (table L.224) is now available for U.S.-chartered depository institutions, property-casualty insurance companies, life insurance companies, closed-end funds, exchange-traded funds, government-sponsored enterprises, mortgage REITs, securities brokers and dealers, holding companies, and other financial business. Previously, only total financial business sector corporate equity issuance outstanding was available. Additional detail on the split between publicly traded and closely held equity outstanding are also newly available on table L.224. Corresponding sector levels tables for all corporate equity issuing sectors now include line items for total liabilities and equity, total liabilities, and total equity. While transactions in financial sector corporate equities were unaffected for most sectors, estimates of net issues for government-sponsored enterprises have been revised due to new methodology.
Corporate equities included in Issuer-to-Holder data	The next release of the Enhanced Financial Accounts Issuer-to-Holder (From-Whom-to-Whom) data will include the corporate equities instrument category. Previously, corporate equities were excluded from the issuer-to-holder dataset due to insufficient detail on financial sector issuance. With the incorporation of corporate equities, the issuer-to-holder dataset now covers all Financial Accounts instrument categories.
Nonmarketable Treasury securities reclassified	Nonmarketable Treasury securities have been reclassified from the instrument category for Treasury securities (tables F.210 and L.210), a type of debt security, to other loans and advances (tables F.216 and L.216). This change aligns the Financial Accounts more closely with the System of National Accounts 2008 (SNA) international guidelines under which only negotiable debt instruments, such as marketable Treasury securities, are classified as debt securities. Measures of total debt (tables D.1-D.3), which include loans and debt securities, are unaffected.
Central clearing counterparties supplementary table	A new supplementary table (L.132.c) showing financial assets and liabilities levels outstanding for central clearing counterparties (CCPs) has been added to the release. CCPs are included in the other financial business sector (tables F.132 and L.132). A forthcoming FEDS note, "Central Clearing Counterparties in the Financial Accounts of the United States" (Matthew Guse, Matthew Hoops, and Maria Perozek), details the construction of these data.

Topic	Description
Fraternal insurance companies reclassified	Fraternal insurance companies have been reclassified from the households and nonprofit organizations sector (tables F.101, L.101, B.101, R.101, and B.101.n) to the life insurance companies sector (tables F.116, L.116, F.116.g, L.116.g, F.116.s, and L.116.s) in accordance with System of National Accounts 2008 international guidelines. Historical revisions related to the reclassification extend back to 1987:Q1. While fraternal insurance companies in the United States are nonprofit organizations and file returns with the Internal Revenue Service under Section 501(c)(8) of the Internal Revenue Code, for statistical purposes they are included in the financial sector because they provide insurance services at economically significant prices.
Change in net worth tables reformatted	The investment section of the change in net worth tables for the households and nonprofit organizations, nonfinancial corporate business, and nonfinancial noncorporate business sectors (tables R.101, R.103, and R.104, respectively) has been reformatted to align more closely with the presentation of assets and liabilities shown on the sector balance sheets (tables B.101, B.103, and B.104).
New table on debt securities statistics added to the "International Data Submissions" page	A new table, Debt Securities Issues by Sector, Currency, Maturity, Interest Rate and Market of Issuance, Stocks at Market Value, has been added to the set of tables for the Bank for International Settlements (BIS) on the Financial Accounts Guide "International Data Submissions" webpage. The table is constructed using Enhanced Financial Accounts Issuer-to-Holder (From-Whom-To-Whom) estimates based on Z.1 Financial Accounts aggregate debt securities holdings data. These tables satisfy Recommendation 7 of the Second Phase of the G20 Data Gaps Initiative (DGI-2) and are submitted to the BIS in SDMX format.

Explanatory Notes

Financial Accounts of the United States

The Statistical Release Z.1, *Financial Accounts of the United States*, or Financial Accounts, is organized into the following sections:

- Matrices summarizing transactions and levels across sectors and tables on debt growth, net national wealth, gross domestic product (GDP), national income, saving, and so on
- Transactions of financial assets and liabilities, by sector and by financial instrument
- Levels of financial assets and liabilities, by sector and by financial instrument
- Balance sheets, including nonfinancial assets, and changes in net worth for households and nonprofit organizations, nonfinancial corporate businesses, and nonfinancial noncorporate businesses
- Supplementary tables including balance sheets for the household sector, nonprofit organization sector, the household and nonprofit organization sector with additional equity and debt detail, and domestic hedge funds, as well as tables detailing stocks and flows of fixed assets
- Integrated Macroeconomic Accounts (IMA)

The IMA relate production, income, saving, and capital formation from the Bureau of Economic Analysis's (BEA) national income and product accounts (NIPA) to changes in net worth from the Financial Accounts on a sector-by-sector basis. The IMA are published jointly by the Federal Reserve Board and BEA and are based on international guidelines and terminology as defined in the System of National Accounts (SNA2008).

Federal Reserve Board staff have taken many steps over the past several years to conform the Financial Accounts with the SNA2008 guidelines. Nonetheless, a few important differences remain, in particular, the following in the Financial Accounts:

- The purchase of consumer durables is treated as investment rather than as consumption.
- Nonfinancial noncorporate businesses (tables F/L/B.104) are not included in the household sector.
- Nearly all debt security asset holdings are reported at market value while most debt security liabilities are at book value. Statistical discrepancies, shown on debt security

instrument tables, accounts for differences in valuations.

Concepts of Levels and Transactions in the SNA and the Financial Accounts

The level of an asset or liability (also referred to as the “stock” or “outstanding”) measures the value of the asset or liability in existence at a point in time. In the Financial Accounts, the levels are reported as of the end of each calendar quarter. In the SNA2008, the change in the level from one period to the next is called the *economic flow*, and can be decomposed into three broad elements: *transactions*, which measure the exchange of assets; *revaluations*, which measure holding gains and losses; and *other changes in volume*, which measure discontinuities or breaks in time series due to disaster losses or a change in source data or definition. In practice, other volume changes are relatively rare, and revaluations occur mainly for series carried at market value (such as corporate equities, real estate, and some debt securities), so for many series the change in the level is equal to the transactions element.

Growth Rates

Growth rates calculated from levels include revaluations and other changes in volume. In order to isolate the effect of transactions on the growth of a given asset or liability, users should calculate the ratio of transactions in a given period to the level in the preceding period.

Growth rates in table D.1 are calculated by dividing transactions at a seasonally adjusted annual rate from table D.2 by seasonally adjusted levels at the end of the previous period from table D.3. Growth rates calculated from changes in unadjusted levels may differ from those in table D.1.

Seasonal Adjustment

Seasonal factors are recalculated and updated with the December release of third-quarter data. Series that exhibit significant seasonal patterns are adjusted. Seasonal factors are generated using the X-13-ARIMA seasonal adjustment program from the U.S. Census Bureau, estimated using the most recent 10 years of transaction data. Due to distortions of seasonal patterns caused by financial crises, seasonal factors for affected series are extrapolated using pre-crisis data until several years of post-crisis data are available. Seasonally adjusted levels shown in table D.3 are derived by carrying forward year-end levels by seasonally adjusted transactions.

Data Revisions

Data shown for the most recent quarters are based on preliminary and potentially incomplete information. A summary list of the most recent data available for each sector is provided in a table following these notes. Nonetheless, when source data are revised or estimation methods are improved, all data are subject to revision. There is no specific revision schedule; rather, data are revised on an ongoing basis. In each release of the Financial Accounts, major revisions are highlighted at the beginning of the publication.

Discrepancies

The data in the Financial Accounts come from a large variety of sources and are subject to limitations and uncertainty due to measurement errors, missing information, and incompatibilities among data sources. The size of this uncertainty cannot be quantified, but its existence is acknowledged by the inclusion of “statistical discrepancies” for various sectors and financial instruments.

The discrepancy for a given sector is defined as the difference between the aggregate value of the sector’s sources of funds and the value of its uses of funds. Sources of funds are gross savings less net capital transfers paid and net increase in liabilities and equity; uses of funds are capital expenditures and the net acquisition of financial assets. If a sector’s sources of funds are greater than its uses of funds, the sector is a net lender of funds in the accounts. In the reverse case, the sector would be a net borrower of funds. Most of the data for deriving gross savings come from the BEA’s NIPA. For a financial instrument category, the discrepancy is defined as the difference between the measurement of funds raised through the financial instrument and funds disbursed through that instrument. The relative size of the statistical discrepancy is one indication of the quality of the underlying source data. Note that differences in seasonal adjustment procedures sometimes result in quarterly discrepancies that partially or completely offset each other in the annual data.

Financial Accounts Guide

Substantially more detail on the construction of the Financial Accounts is available in the *Financial Accounts Guide*, which provides interactive, online documentation for each data series. The tools and descriptions in the guide are designed to help users understand the structure and content of the Financial Accounts.

Each input and calculated series in the Z.1 is identified according to a unique string of patterned numbers and letters. The series structure page of the guide provides a

breakdown of what the letters and numbers represent in the series mnemonics. Some data submissions to international organizations are also available in the guide. The guide is updated with the quarterly release and is available online:

Enhanced Financial Accounts and Data Visualization

Additional supplementary information is available online in the Enhanced Financial Accounts, which augment the Financial Accounts with finer detail, additional types of activities, higher-frequency data, and more-disaggregated data. Links to the Enhanced Financial Accounts are available from both the *Financial Accounts Guide* page and the main release page. In addition, interactive online data visualizations are available for selected components of the Financial Accounts and Enhanced Financial Accounts. Links are available also on the same pages.

Production Schedule

The Financial Accounts are published four times per year, about 10 weeks following the end of each calendar quarter. The publication is available online:

www.federalreserve.gov/releases/Z1

This website also provides CSV files of quarterly data for transactions at a seasonally adjusted annual rate, unadjusted transactions, levels outstanding, balance sheets, debt tables, supplementary tables, and the IMA.

In addition, the data are available as customizable datasets through the Federal Reserve Board’s Data Download Program online:

General notes: A = assets; L = liabilities. Domestic nonfinancial sectors (columns 9 and 10) are households and nonprofit organizations, nonfinancial business, state and local governments, and federal government. Equity included in line 2 is the sum of corporate equities (line 24), equity in noncorporate business (line 30), and foreign direct investment in the U.S. (FDI) equity (line 34) for domestic sectors or U.S. direct investment abroad equity for the rest of the world (line 32). The matrix shows a discrepancy in column 17 for monetary gold (line 4) because by international accounting convention, monetary gold is a financial asset without a corresponding liability.

General notes: A = assets; L = liabilities. Domestic nonfinancial sectors (columns 9 and 10) are households and nonprofit organizations, nonfinancial business, state and local governments, and federal government. Equity included in line 2 is the sum of corporate equities (line 24), equity in noncorporate business (line 30), and foreign direct investment in the U.S. (FDI) equity (line 34) for domestic sectors or U.S. direct investment abroad equity for the rest of the world (line 32). The matrix shows a discrepancy in column 17 for monetary gold (line 4) because by international accounting convention, monetary gold is a financial asset without a corresponding liability.

(3) Sum of lines 46, 47, 48, and 50.
